

**Explanatory notes:**

- All prices are quoted **exclusive** of VAT, which will be added to all invoices at the applicable rate.
- Prices shown below are based on the 20 kilogram minimum quantity accepted for processing. Discounts may be negotiated for amounts greater than 40 kg, provided they constitute a single batch.
- Spinning prices include return of yarn as oiled on cone or oiled hanks, not individually weighed, unless otherwise requested (see Optional Extras).
- Spinning and Optional Extras prices are for the weight of returned yarn, including cones where used.
- Set-up, Sorting (e.g. for colours), Scouring and Carding only and Tops are all charged on the weight of fibre received for processing, and Disposal is charged on actual weight disposed of.
- Additional charges may be made to cover any additional costs incurred by us in fulfilling an order (e.g. extra work on preparation or adding fibre to enable us to process), and will always include the costs of carriage of goods to and from our premises if we make the arrangements.
- New polypropylene bags are supplied free for the despatch of fleece and return of yarn.
- We would be grateful for the return of cones once you have used your yarn.
- Please contact us to discuss other yarn specifications (finer, thicker, 4- or 5- ply, etc.), ball band designs, etc.
- We charge £7.50 per sack (£8 for organic) plus VAT monthly for storage of finished goods not collected from one month after invoice date and may charge interest on late payment at 4% over Bank of Scotland base rate.

Prices all £ per kilogram unless otherwise stated	Wool	Mohair	Alpaca	Organic
<b>On-off charges (as applicable)</b>				
Set-up charge – on incoming weight	1.50	1.50	1.50	1.50

completing Order and Compliance Forms,  
Packing and Despatch Instructions  
*February 2010 Update*

The Natural Fibre Company

## **Order and Compliance Forms**

Please complete one order form for each batch of fleece to be processed (e.g. per colour or type of yarn required), but not for each bag. Please place the order form, compliance form and any other correspondence in the top of one of the bags and clearly identify the bag or group of bags to which the form relates. It would help if you would also return any unused bags and cones.

You may either include your order form with your fleece or post it to us separately. If you put it in the bag with fleece, it is advisable to put it inside a polythene bag or envelope. Please complete the form as far as possible, but also please do not hesitate to contact us with any questions or to discuss the details.

IT IS VERY IMPORTANT THAT THE COMPLIANCE FORM IS FULLY COMPLETED. This form is essential for us to judge whether the fleece contains pesticides and gives you two options. You can either say you have used no treatments (and delete the second paragraph) or say that you have used treatments (and delete the first paragraph) when please also complete the details and dates of those treatments in the space provided. In either case you should also complete the date of shearing. By signing the form you confirm the pesticide status of the fleece, the date of shearing and that you accept our terms of business.

*Allopathic means a treatment which is not homeopathic and includes all conventional veterinary products and treatments.*

## **Bags, batches and weight**

Our pre-addressed bags are designed to take around 20 kg of wool (they will take more alpaca and mohair). Please note that if you use your own bags, and they are larger, this may exceed our carrier's weight restrictions (25 kg).

Our minimum order quantity for spinning is 20 kilograms, and you should find that you can get this amount into one of our bags. Please ensure that you do not put more than 25 kilograms into a bag, as this is the maximum permitted for health and safety, both for us and for our couriers. Please ensure the bags are well sealed, preferably sewn up or closed with a cable tie. It is better to stick any adhesive labels to a luggage label and tie them to the sack as the polypropylene sacks tend to lose sticky labels in transit.

## **Fleece and quality**

Please note that including vegetation, fleece that has been damp or stored for several years, dags and matted fleece will only result in this being removed when we sort your fleece. Please also note that we charge for disposal of reject fibre and for dealing with moths, maggots or other 'nasties' which not only spoil your own fleece, but can also affect the rest of our customers' fleece. If you are unable to send us a full 20 kilograms, you could consider saving fleece (up to three years is usually OK if stored cool and dry), requesting us to add appropriate/similar fleece to make up the weight or participating in a share scheme.

## **Couriers**

We use Parcelforce or TNT to collect fleece from our customers. They collect between 9 and 5, Monday to Friday. It is only possible to arrange the day and not the time of day. If you let us know your preferred day and confirm the pick-up address, we will then book the collection for that day. We need at least one day's notice – which allows us to book for the following day, although sometimes an early booking can enable same-day collection.

The carriers prefer someone to be present to hand over the goods and to sign their paperwork – so if it is more convenient, you can arrange for the pick-up to be from a different address to your home address (e.g. a neighbour or friend, who is in all day, or from your office). You can, however, leave sacks in an accessible sheltered place by arrangement.

Please be aware that the carriers levy the full collection charge if they are not able to make a collection on the day (e.g. if you or the sacks are not there when they call).

If you are not able to be in all day, it is possible, but only by arrangement, to deliver bags to a Parcelforce or TNT service centre. We can provide further information if you contact us.
